

Properties of Set

- Unordered - Element do not have fixed position
- Mutable - you can add or remove elements
- No Duplicates - automatically removed
- No indexing - Cannot access element using index
- Defined using $\{ \}$ or `set()`

Eg:

$S = \{ 10, 20, 20, 30 \}$

`print(S)`

$\{ 10, 20, 30 \}$

Properties of tuples :

ordered - Element maintain their Order

Immutable - Cannot add, remove or modify element after creation

Allow duplicates - Allowed

Supporting indexing - Element can access using indexing.

Defined using `{ }`

Eg:

```
t = {10, 20, 20, 30}
```

```
print (t[1])
```

20
